Kratek opis

Flat suction cup, round, Silicone material, »PFG«, ø:20
suitable connection nipple IT G 1/8, suitable connection
nipple ET G 1/8

Robust and hard-wearing suction pad with a single sealing
lip.

Used wherever objects (parts, packing materials, etc.) need
to be lifted, transported, turned over or handled in some
other manner. It is also ideal when it is necessary to handle
smooth or slightly rough surfaces. Due to its flat shape, it
can grip the workpiece in a very short time and withstand
the forces that result from fast movement of the object
during handling. It acts as the connecting element between
the vacuum generator and the workpiece.

Properties:

- Very short evacuation times
- Suitable for high lateral forces
- Good intrinsic stability when attached to the load
- Supports on the bottom
- Very short cycle times
- High suction forces with small dimensions

Applications:

Handling workpieces with smooth or slightly rough surfaces,
e.g. metal sheets,
cardboard boxes, sheets of glass, plastic parts and sheets of
wood.
