Kratek opis

Flat suction cup, oval, Silicone material, »SGO«, Ø30x10
suitable connection nipple IT G 1/8, suitable connection
nipple ET G 1/8

Robust and hard-wearing suction pad with a single, oval-
shaped sealing lip.

Used wherever objects (parts, packing materials, etc.) need
to be lifted, transported, turned over or handled in some
other manner. It is also ideal when it is necessary to handle
long or flat workpieces. Due to its oval shape, it has a
considerably higher suction force than round, flat suction
pads when handling narrow or long workpieces.

It acts as the connecting element between the vacuum
generator and the workpiece.

Properties:

- Higher suction force for narrow workpieces
- Supports on the bottom
- High suction force in spite of small dimensions

Applications:

- Handling narrow workpieces and strips
- Handling workpieces with only a small, narrow gripping
surface
